Trident Casement Lock System fitted exclusively to the 60mm Tritec

Security

Trident hardware is 'Secured by Design' compliant and meets the requirements of BS7950 utilising technology previously used only in door hardware providing a revolutionary window lock which exceeds the security of the old espage.

- An easily identified green restrictor can be retro-fitted
- The restrictor is discreetly integrated within the sash rebate
- Simple to release without prior knowledge
- Re-engages automatically. (Restrictor arm sold separately)

Shootbolt Casement Locking System - 70mm Product only

The Shootbolt locking system provides exceptional levels of security through an extremely effective combination of mushroom headed steel cams and steel shootbolts operated via a smooth reverse action gearbox.

- Mushroom cams are adjustable for compression by +/- 1mm
- BBA tested and approved and Secured by Design compliant
